Reflections at the golden milestone:

From slide rules to silicon

As we gather for our 50th anniversary, we don't just look back at a date on a calendar; we look back at a world transformed. We began our journey in an era of analog precision. We remember the rhythmic click of the slide rule. Our "calculations" weren't just keystrokes; they were deliberate acts of patience and physical grit. We learned to build with our hands. To trust our intuition, and to solve problems when the only "search engine" available was a dusty library shelf.

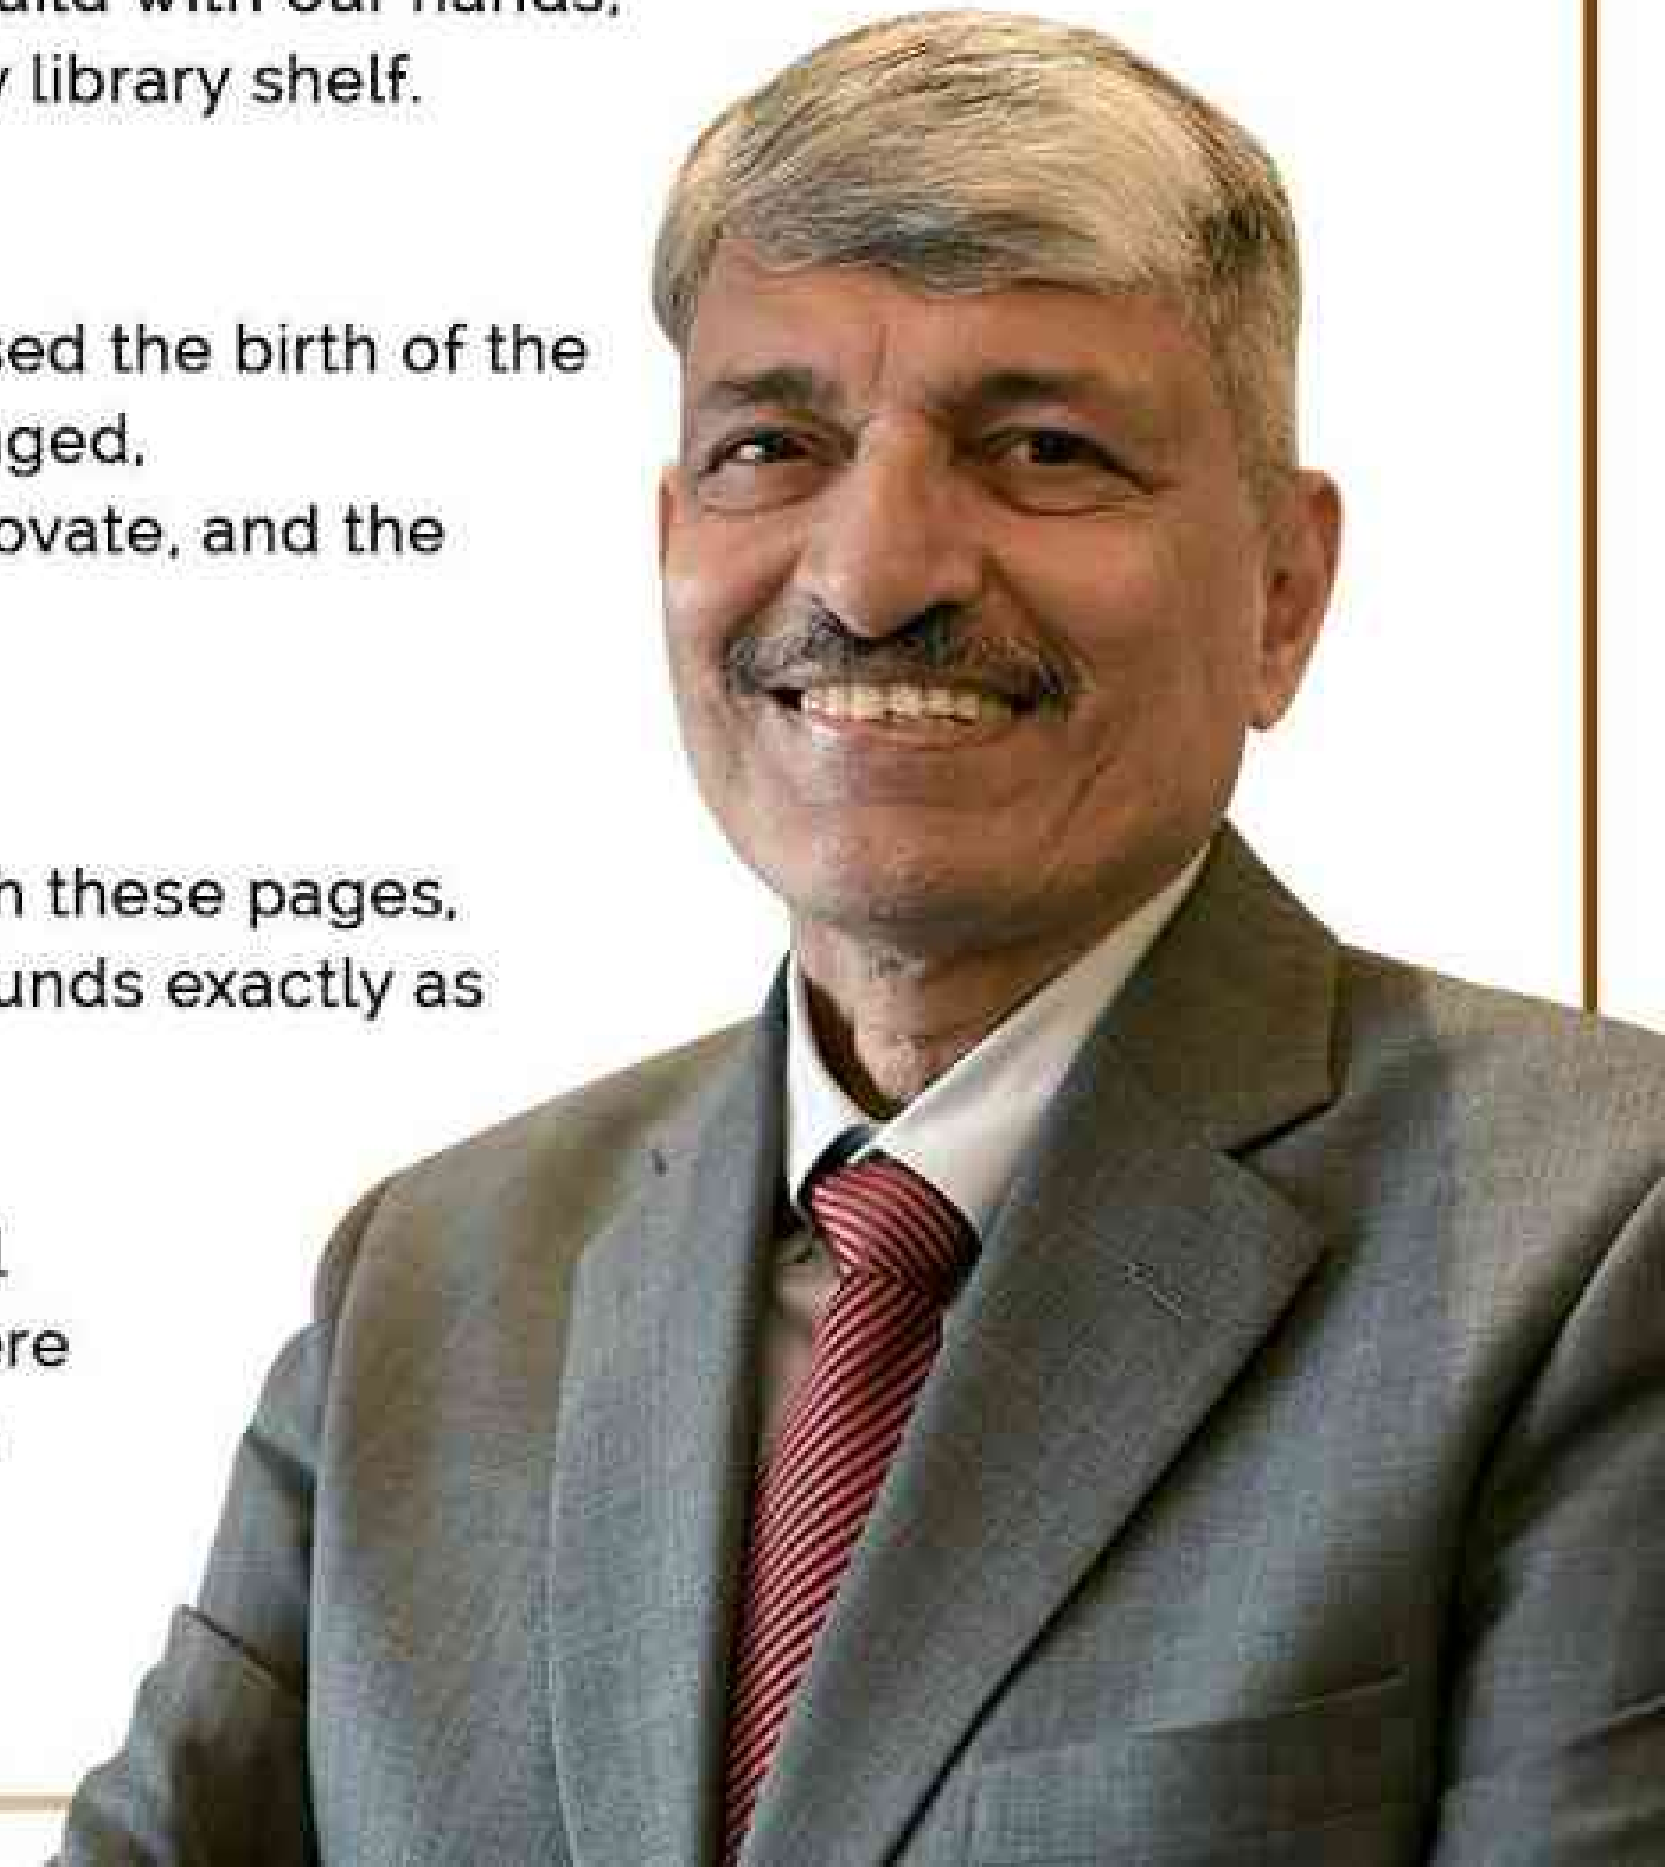

The great transition

Since we walked out of those campus gates, the world has shifted beneath our feet. We witnessed the birth of the Pc, the rise of the internet, and now, the dawn of artificial intelligence. While the tools have changed. The engineering spirit we forged remains identical. The discipline to analyze, the courage to innovate, and the integrity to build things that last are constants that no algorithm can replace.

The unbroken bond

But a batch is more than a collection of careers; it is a tapestry of shared lives. As we flip through these pages. We celebrate the successes, the gray hair earned through wisdom, and the laughter that still sounds exactly as it did in the hostel corridors.

However, our circle feels a little quieter this year. As we reflect on our journey, we hold a special Place in our hearts for the friends and brothers who are no longer with us. Though they aren't here To share their accomplishments in this souvenir, their contributions to our lives remain etched in Our foundation.

In Remembrance

As we celebrate fifty years of journeys and triumphs, we pause to honour those who started this marathon with us but reached the finish line too soon.

अब हम उनके साक्षात दर्शन नहीं कर पाएंगे । उनके श्री चरणों में श्रद्धा सुमन अर्पित कर उन्हें भी इस स्वर्ण जयन्ती समारोह में याद कर लें ।

Salutation to the architects of our journey

We honour the mentors and guardians who shaped our path. Though names and faces changed through the years, your impact remains our constant foundation.

Academic Leadership

We extend our deepest gratitude to the Principals, Heads of Departments, and Faculty. Your vision steered our institution through every transition. Thank you for the intellectual rigor and the timeless wisdom that continues to define our professional lives.

Masters of the Craft

To the Incharges and Gurus of various Labs and shops such as Blacksmith, Carpentry, and Sheet Metal Shops: You met us when we were "raw" and unpolished. Through the heat of the forge and the precision of the blade, you taught us that true engineering is forged by hand and heart alike.

The Campus Heart

Our sincere thanks to the Chef, Butler, and Canteen Staff. You provided far more than sustenance; you provided the warmth of a home away from home. Because of your dedication, we never truly missed a home-cooked meal.

Coaches of Character

To our Instructors and Coaches of NCC, NSS, and Sports: From the Swimming pool to the Cricket, Badminton, and Basketball courts, and the Billiards table—you redefined our limits. You transformed us into all-rounders, ready to face the world with grit.

Message from **Er. Manish Gupta**

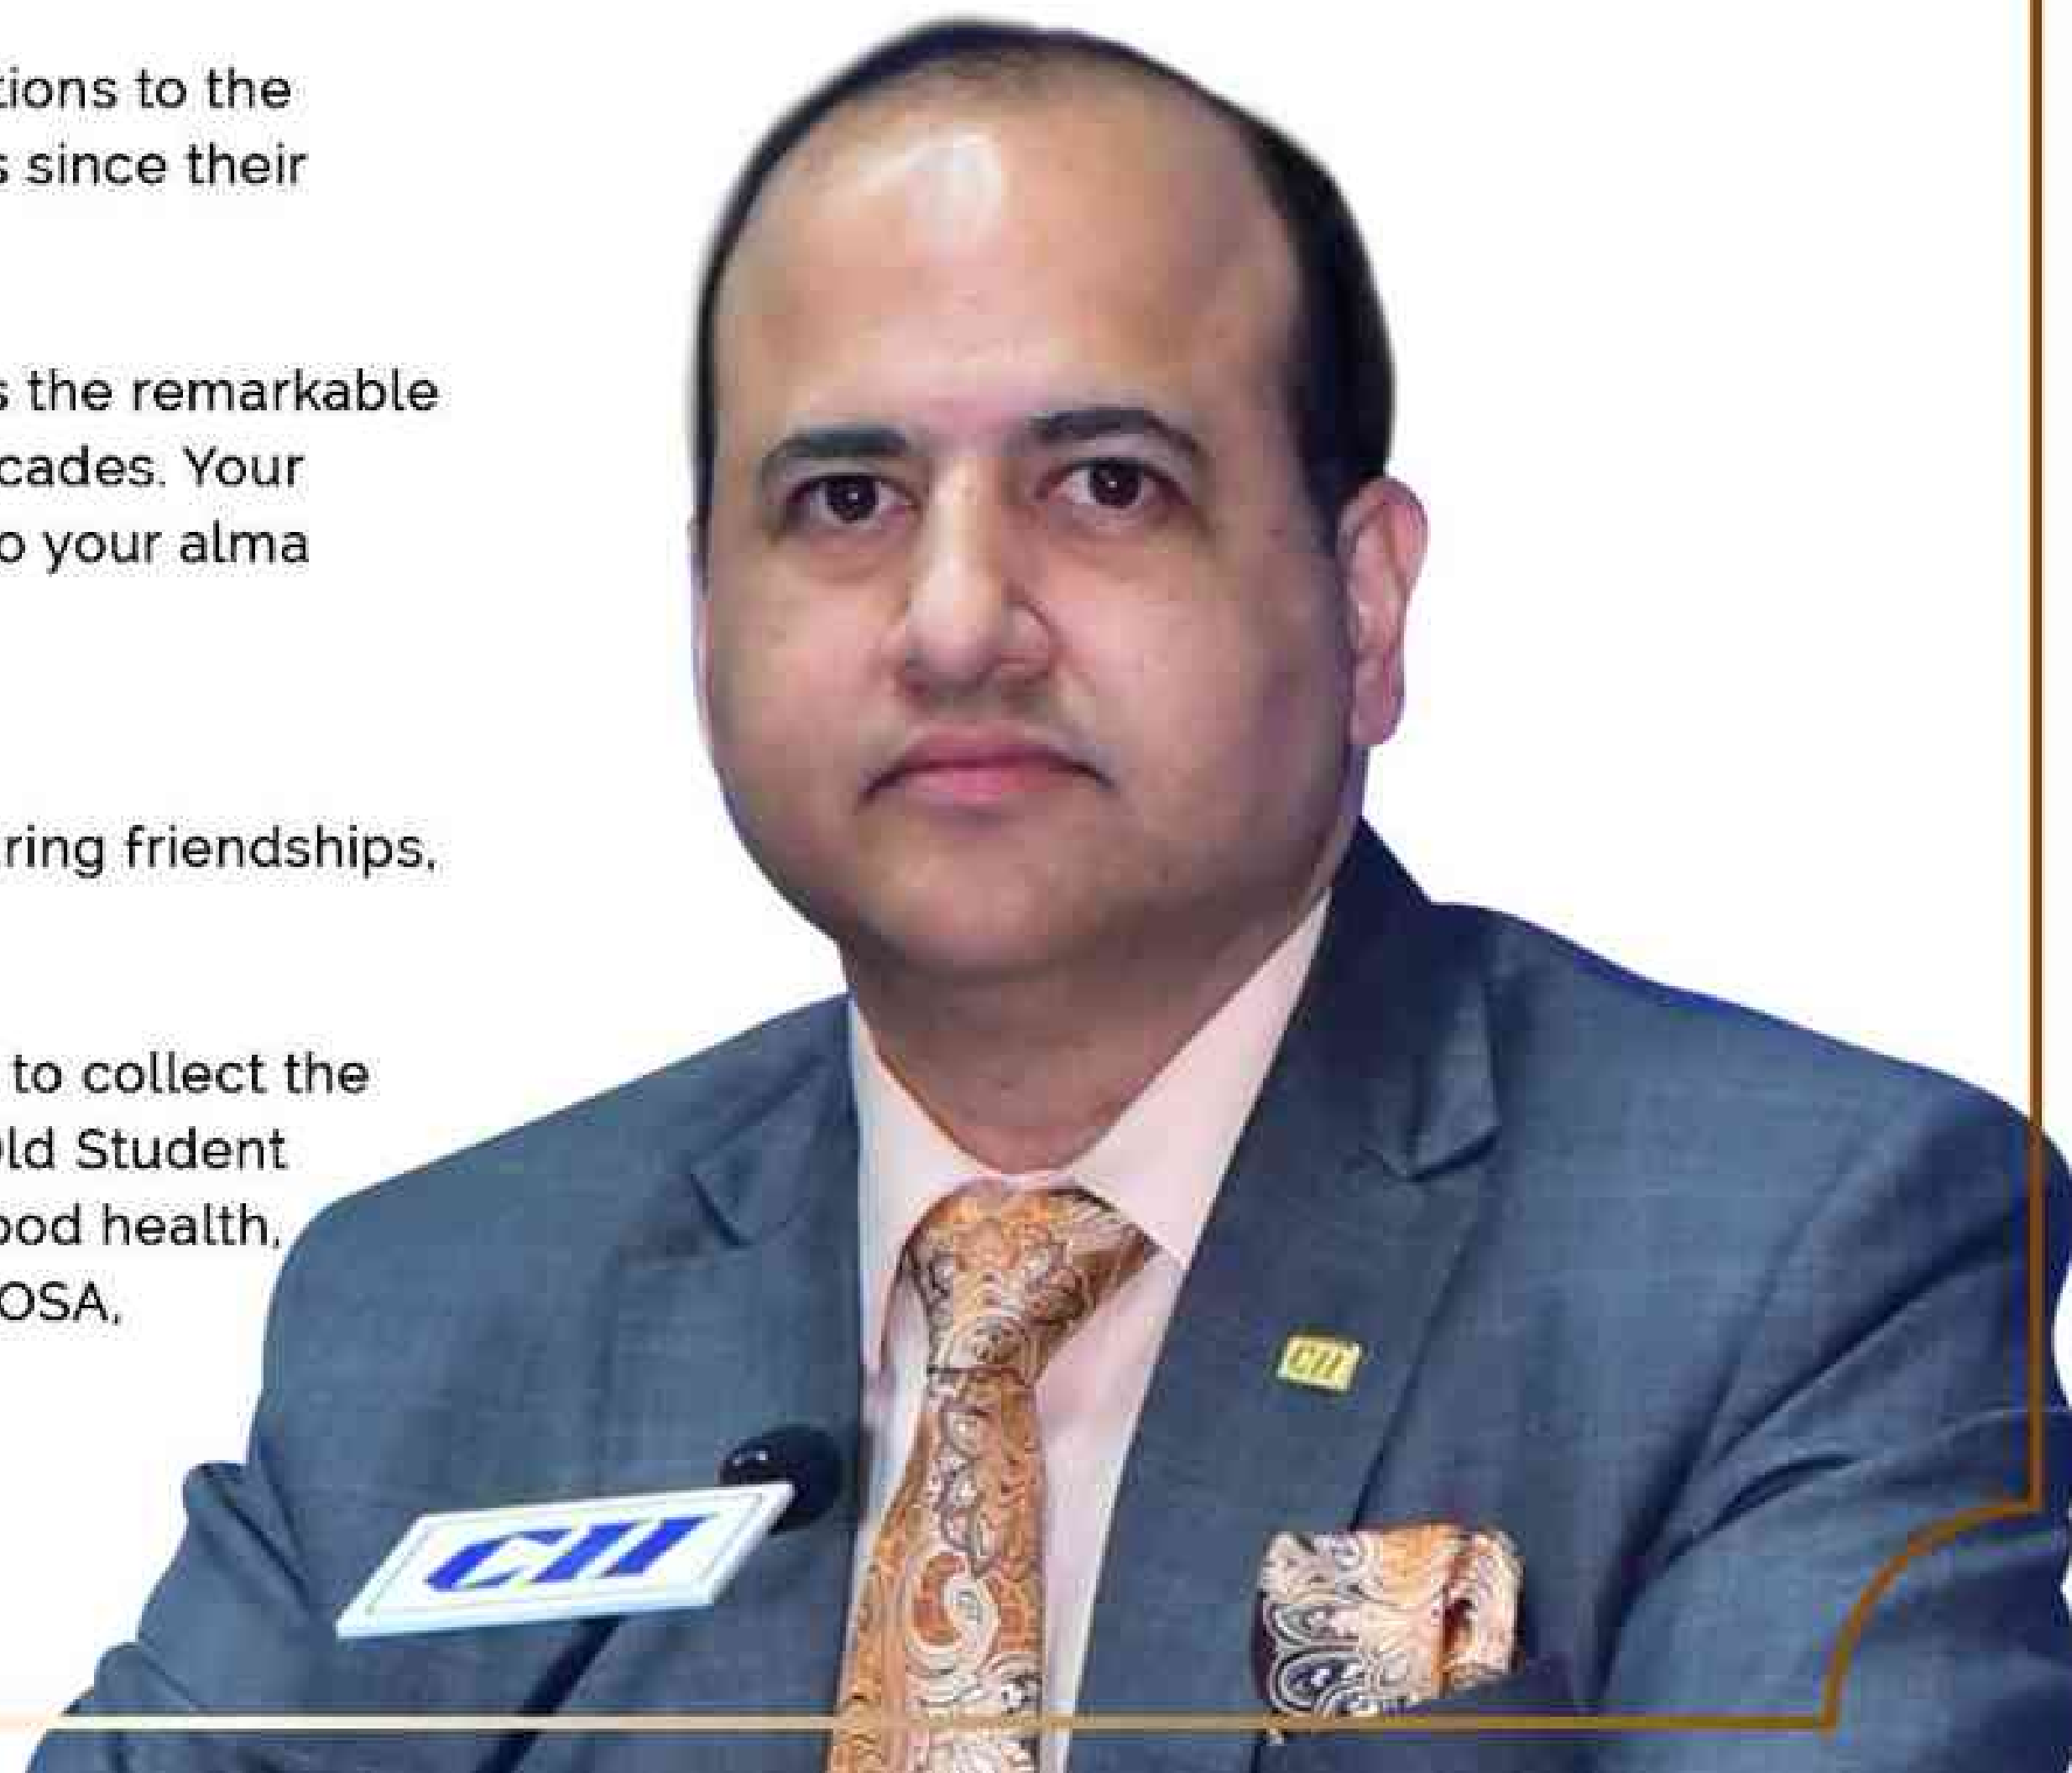

President, PEC Old Student Association (PECOSA)

It is a matter of great pride and pleasure to extend my heartfelt congratulations to the distinguished alumni of the Batch of 1976 on completing fifty glorious years since their graduation from Punjab Engineering College, Chandigarh.

This Golden Jubilee marks not only the passage of time but also celebrates the remarkable contributions made by this batch across diverse fields over the past five decades. Your achievements and commitment to excellence have brought great Honour to your alma mater and continue to inspire generations of PECosians.

The release of this Souvenir is a fitting tribute to cherished memories, enduring friendships, and the lifelong bond shared with the institution.

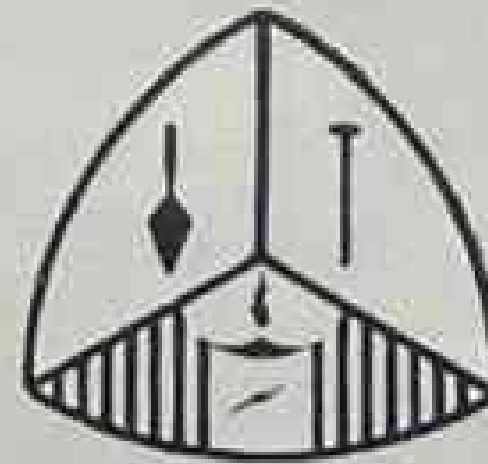

I convey my warmest wishes to Er. Deepak Bakhshi for his zeal and passion to collect the old memories and rekindle them with present ones. On behalf of the PEC Old Student Association (PECOSA) I also wish everyone from this esteemed batch for good health, happiness and continued association with PEC and alumni Association PECOSA.

Message

I am glad to know that the next issue of the Souvenir of the outgoing graduates of 1976 is going to be published soon. This Souvenir gives the photographs and hidden stories of the individuals and brings to mind the happy memories of their college career.

This year 1975-76 has been remarkable—perhaps due to the Emergency and the students have acquitted themselves in a very creditable manner. The educational programmes have been conducted with great zest and I congratulate the students on the same. They should try to inculcate inner discipline, restraint and sense of direction which will stand them in good stead.

The future augurs well for the engineers and I wish them success in their career.

LET LIFE BE MEANINGFUL !

Young Friends,

Ever since Darwin proved that man evolved from apes there has been a tendency among the intellectuals to treat man as a social animal and nothing more. However, this view is not correct.

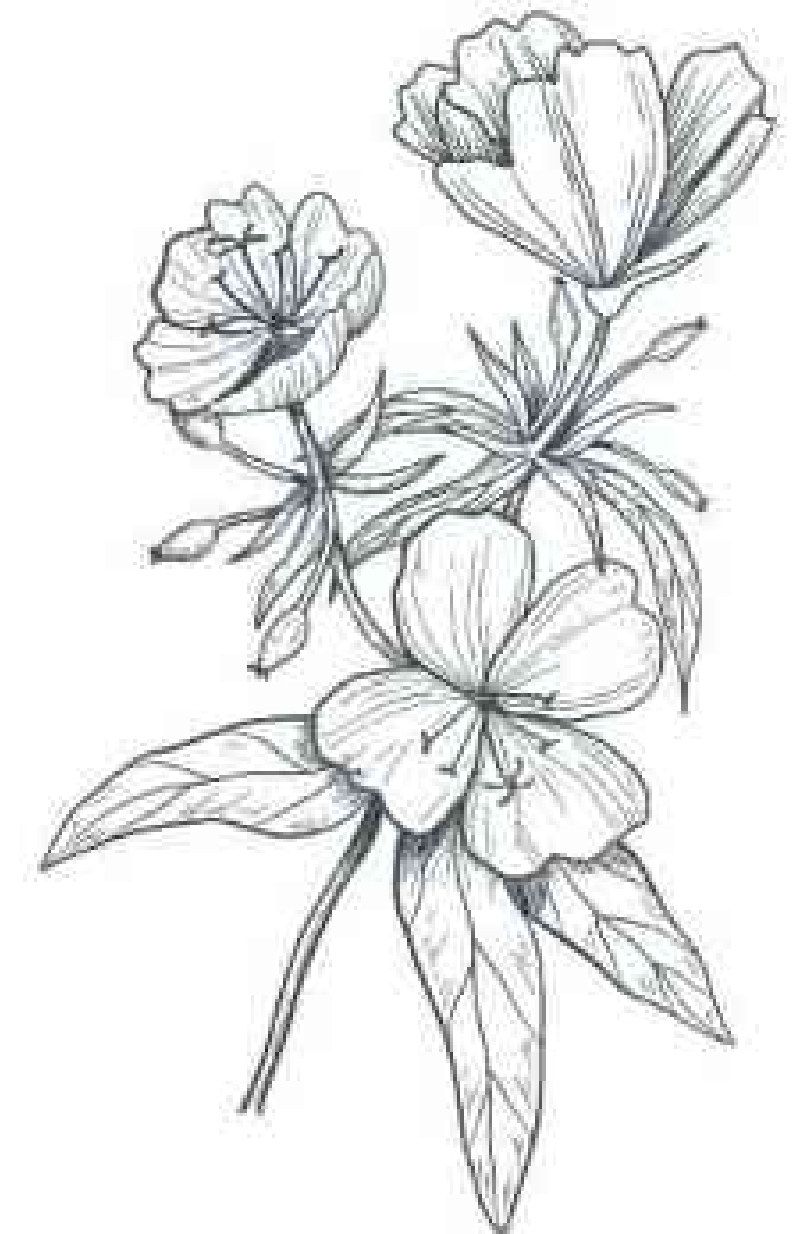

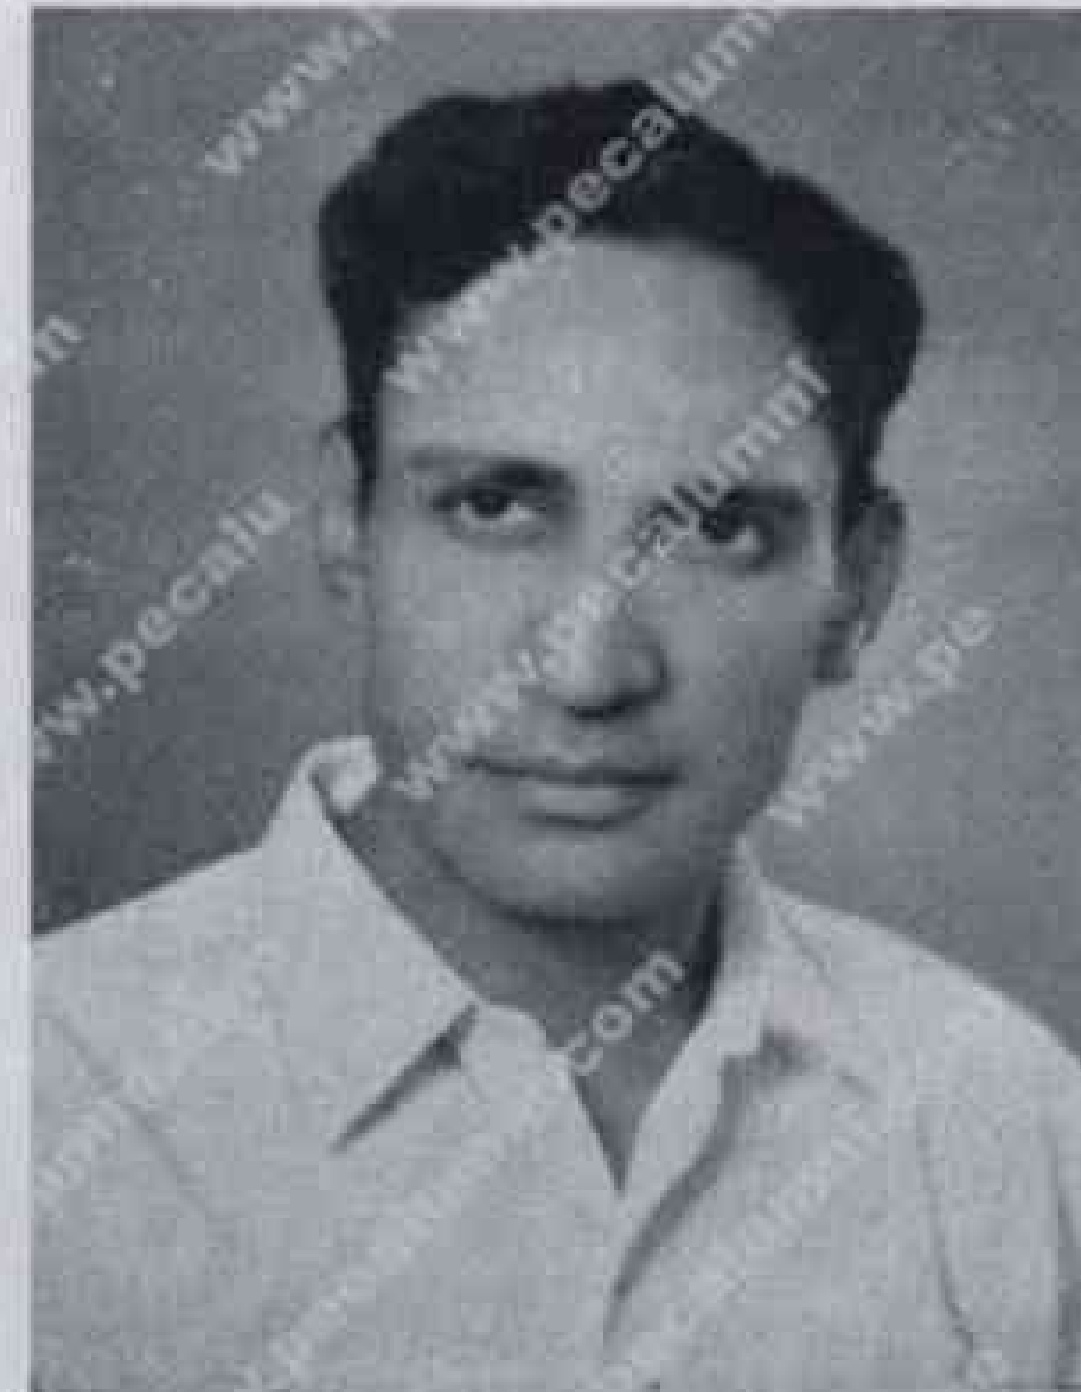

Close observation reveals that man no doubt is an animal but it is so only if it wants to be so. Man has a potential for existence at a level higher, infact much higher, than that of an animal. Man can reflect upon himself and his surroundings. He can modify his environment. In his personal Self he can bring about modifications so that his consciousness becomes akin to superconsciousness. The natural flow of this consciousness is that of universal love. Hate, lust, anger, caprice, ego no longer exist for him. His universal love urges him to serve others and to be of use to them because in doing so he infact serves his own self. Life for such a being has a meaning like that of a river satiating the thirst of the land through which it passes.

To day when you are leaving the portals of this temple of learning, I want to remind you that a knowledge of engineering principles and acquired skill is not enough in life. Let your life be meaningful. Do not think that the teachings of Truth, Love, Service and Sacrifice are meant for college life only. Live with them. They are the foundations on which your future life will grow. Let your love for your country and humanity urge you to invent, discover, design and manufacture so that a flow of universal love engulfs all of us. Then life will have a different meaning.

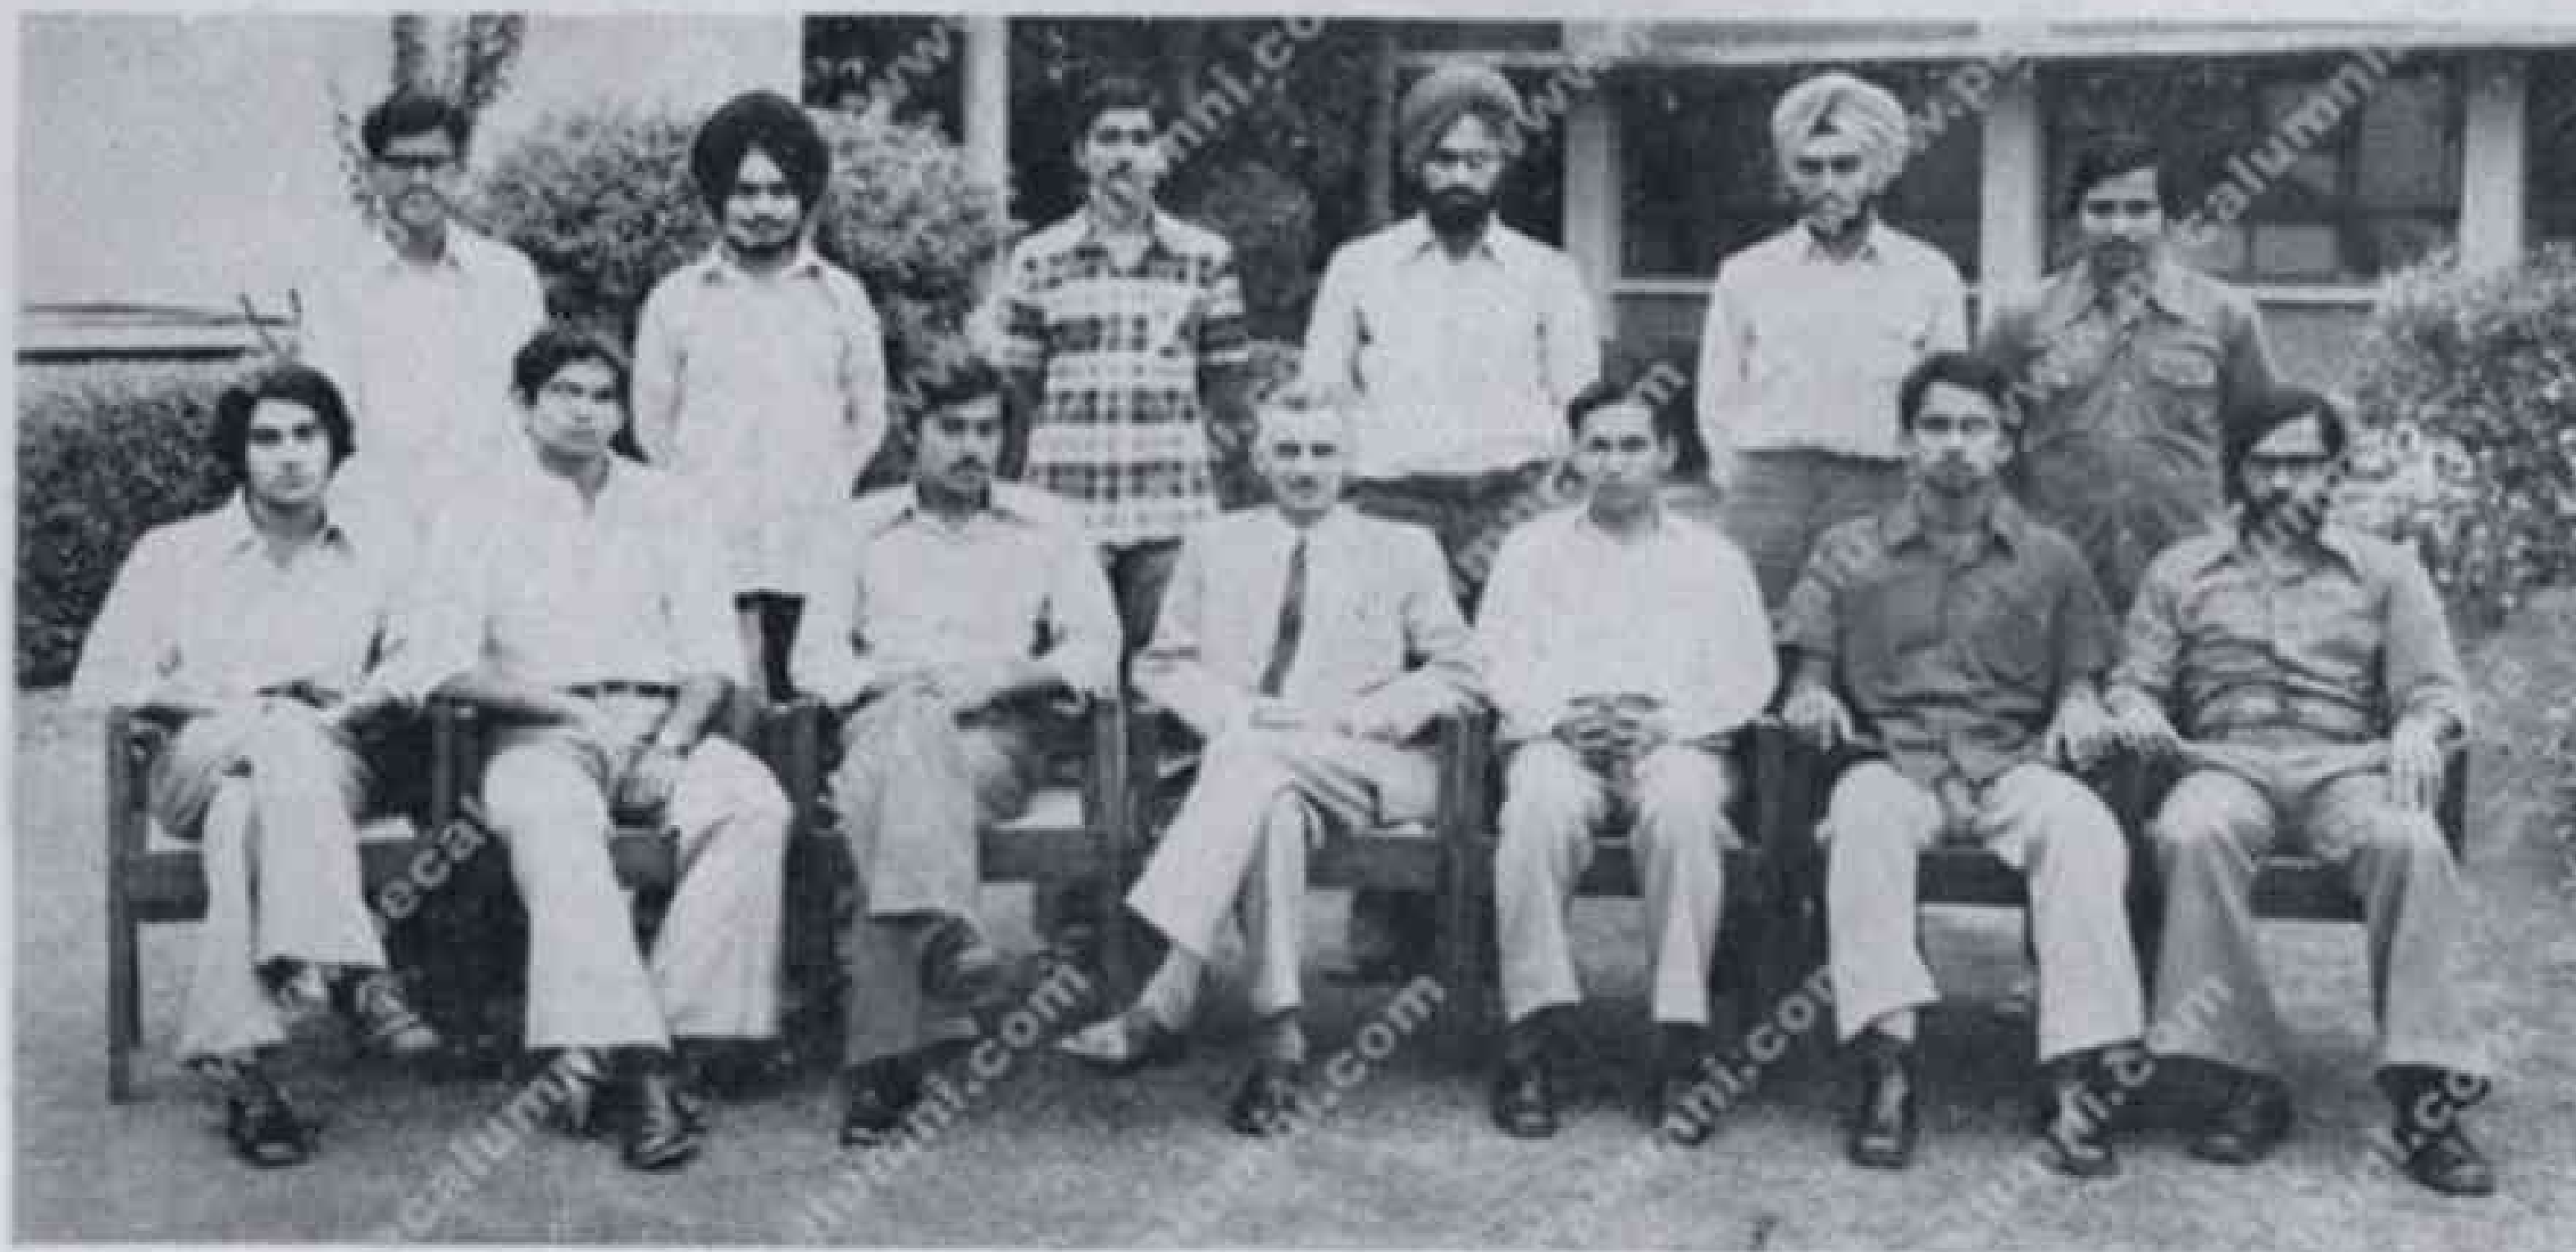

To this end for you I pray. May you blossom to the fullness of your self so that the fragrance of your deeds enthralls humanity for all times to come !

Editorial

There is, of course, no end to learning. But a chapter closes in the lives of the engineers graduating this year, and a fresh one begins.

Let us face it, life will not always be a bed of roses for all of us. Life is full of vicissitudes and it is better to be prepared than to be caught unawares. An important thing that would help see you through is confidence in yourself. Though true confidence comes with experience and time, a belief in your abilities and potential for hard work would prove to be of a distinct advantage to you. And apart from the fact that you have certain obligations to fulfill to others who are close to you, you have responsibilities towards yourself as well. You owe it to yourself to be a success, to meet all difficulties with courage and determination and to emerge victorious over them. So trust in yourself, in your abilities, and go in and win.

Friends, it has been 50 years since we stepped out of PEC to walk our separate paths and to meet our individual destinies. During this journey we have had many successes and some failures, we have loved and lost, felt joy and sorrow, met some great persons and had significant relationships - all our experiences have been of great value to us because they made us who we are now - absolutely awesome people!

It is wonderful indeed to be able to meet once again, and to bask in each other's company. As we look back with warmth and pleasure at our shared moments, let us not forget though that our best time could yet be waiting for us. As worldly pulls and pressures recede from our lives, we are now more free than ever to be who we are and to do what we really like to do. So let's look forward to having a lovely time ahead!

Cheers!"

Would rather be called "Rasia" but his unobliging friends insist on calling him "Chacha". The style with which he tells jokes is usually more humorous than his jokes are. He is fond of insisting new places but is seen mostly in Bisht's room. Plays billiards very well. Other hobbies boating, swimming and bridge.

Last year winded up my business of mining and stone crushing. Now enjoying retired life in Kanpur. Daily routine going to Health club and playing bridge and watching TV

To be greeted by “Mottoo” is a painfully memorable experience because our “Bhoroo's” idea is to Crush you in a bear-hug. A Univ W'lifting champ in the heavy classes. he has developed a sure method of winning arguments in his favour by supplementing brain with brawn. Believes eating especially hot dogs and lately, hamburgers to be the cure for all maladies of head and heart.

Known for his feats as ‘strong man’ during college days (led PEC to University weight lifting trophy), Jitesh was later selected in the IAS, Assam Meghalaya cadre. After serving in several positions in the Centre and the state, he retired as Chief Secretary Assam in 2015. Acknowledgement

A Project of this magnitude, spanning fifty years of history and hundreds of miles of distance, is never a solo effort. It is the result of persistence, digital connectivity, and the unwavering support of a few key individuals.

My heartfelt thanks to:

Ajay Marchanda and K K Jaitly: For being the digital architect who created, maintained and regularly updated WhatsApp groups .

Dhan Kumar Jain: For your tireless effort in expanding our circle through persistence in tracing lost contacts and bringing many of us back into the fold .

Neeraj Sood: For being my pillar of encouragement, when responses were slow and stuck. When the task of data collection felt uphill, your steady motivation kept me moving forward.

Col Lamba: For spontaneously coming forward and taking the lead in arranging a reunion dinner at DSOI, a day prior to the Official meet.

To the Creative Team

A special note of gratitude to the Digital Team at **Pixelpav Digital Private Ltd.**, an upcoming advertising agency that took our raw memories and turned them into this polished tribute.

To **Annie, Avisha,** and **Sneha:** Thank you for working overtime, patiently handling numerous corrections, and pouring your creativity into the design of this e-souvenir. Your professional touch has ensured that our Golden Jubilee memories are preserved with the elegance they deserve.

Some chapters deserve to be saved forever.
